Framing Subcommittee
(Data, Analytics, and Strategy)

October 13, 2021

Our time today

Welcome and Review/Approve Minutes

Status of Narrative Drafting

Discussion:

Story Collecting,

Data-related Values

Summary and next steps

Welcome
Review and
Approve Minutes

Narrative Feedback

- Questions?

- Reflections?

- Comments?

Discussion 1 –

Process for Story Collection --

- Who can provide stories?
- How should we gather and select stories?
- What level of detail can we use?

Discussion 2 –

Data-related Values --

- Returning to the *Ideation* phase
- Generating general and specific ideas for consideration
- Apply to all Subcommittee charges –
  - data, analytics, strategy, narrative

Foundational Practices for Health Equity

- I: Expand Understanding of Health in Words and Action
  (narrative work)
- II: Assess and Influence the Policy Context
- III: Lead with an Equity Focus
- IV: Use Data to Advance Health Equity
  (data/analytics)
- V: Advance Equity through Continuous Learning
- VI: Support Successful Partnerships and Strengthen Community Capacity
- VII: Assure Strategic and Targeted Use of Resources

https://www.astho.org/Health-Equity/Documents/Foundational-Practices-for-Health-Equity/
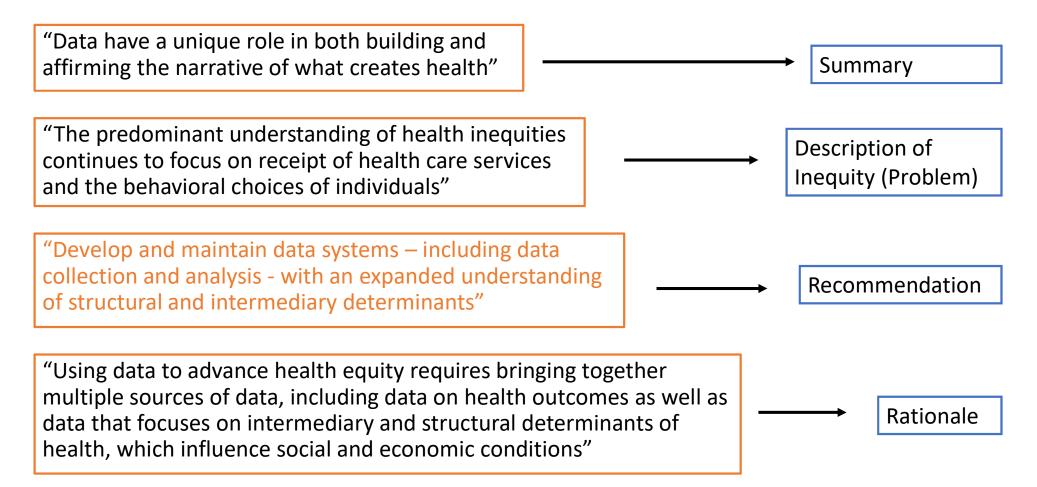

IV: Use Data to Advance Health Equity

The organization has performance improvement systems and infrastructure that provide actionable data for improvement and accountability advancing health equity

IV: Use Data to Advance Health Equity

- Develop and maintain data systems – including data collection and analysis - with an expanded understanding of structural and intermediary determinants

- Analyze data effectively in order to monitor trends and impacts of social determinants of health and health inequities

- Report data to stakeholders and the public in order to promote action to advance health equity

ASTHO example alongside GHEC ideation

"Data have a unique role in both building and affirming the narrative of what creates health" → Summary

"The predominant understanding of health inequities continues to focus on receipt of health care services and the behavioral choices of individuals" → Description of Inequity (Problem)

"Develop and maintain data systems – including data collection and analysis - with an expanded understanding of structural and intermediary determinants" → Recommendation

"Using data to advance health equity requires bringing together multiple sources of data, including data on health outcomes as well as data that focuses on intermediary and structural determinants of health, which influence social and economic conditions" → Rationale

Next Steps

- Provide any further feedback on narrative

- Watch for
    - A draft of data values
    - An ask to provide data recommendations ideas

Wrap-up and Next Steps
