FRAMING: Data, Analytics and Strategy

Refined Ideation Phase for Subcommittee

The Framing subcommittee's focus during the ideation stage will be **identifying what is the overarching story you want to tell?** The story you create will set the vision for the council's work and will be a key framework for how we will organize and package our recommendations.

Deliverables:

1. Frame: that defines the overarching story we want to tell
2. A set of recommendations that flows from the Frame (e.g. related to data, measurement, etc.)

What is the overarching story we want to tell to advance health equity in WI?

- What narratives will allow us to achieve the EO (below)?
- What narratives are we up against to achieve the EO (below)?

“The purpose of the council is to address the various factors that exacerbate health disparities by creating a comprehensive plan to achieve long-lasting and equitable health outcomes for all Wisconsinites.

The plan will address health disparities based on race, economic status, education level, history of incarceration, and geographic location.” – DHS website

The Governor’s Health Equity Council shall develop a plan, supported by a body of research, with key benchmarks to reduce and eliminate health disparities throughout the State of Wisconsin by 2030. The plan shall address health disparities in populations based on race, economic status, education level, history of incarceration, and geographic location. The Health Equity Council may create such subcommittees as are necessary to achieve this mission.

Today -- Principles, Values, and Narrative

Overview of Drafted Outline

List and short descriptions of Principles + Values

Narrative Outline

Questions + Reflections + Comments

(Pull up Word document)

Discussion Prompts

Identify any additional values, points, and stories we want represented

Think of and name 1-3 top policy changes to advance health equity
(5 min, then round robin)

- Full Reparations for those who have experienced slavery in their histories
- Eviction Prevention
- Guaranteed minimum income
- Universal health care
- Emergency MH services for uninsured / Full MH services
- Longer post-partum coverage
- Medicaid coverage of traditional medicine/healing services
- Universal Pre-School, Sick Leave
- Medication costs
- Full Treaty Benefits
- Access to Safe, Affordable, Quality Housing

Discussion Questions

Describe Values/Beliefs that underlie those policies:

What attitudes do we need to move these policies/holding back?

- * Lack of understanding, education, and empathy.
- * fear that others will be helped at their expense
- * Need for Champions

Why do we want these policies to be in place?

What do we believe about the way things should be that make these policies seem right?

What do we believe about the way things work that make us think these would advance health equity?

Additional Actions

Sort through Values/Beliefs

What's most important?

What's a value vs a principle?

A wide-angle photograph of a coastal dune landscape. A wooden boardwalk, constructed from light-colored planks, winds from the bottom center towards the middle ground, curving to the left. The dunes are covered in tall, green grasses and some purple heather. In the background, a line of dark evergreen trees marks the horizon under a heavy, grey, overcast sky. The overall mood is serene and natural.

Wrap-up and Next Steps
